WORK EXPERIENCE

Developer

Beyondsoft Consulting, Inc - April 2015 to Present

Developer responsible for maintaining ETLs and databases, managing version control and development workflows, and leading web development & design.
Responsibilities
● Documentation and conventions around use of SourceTree, Bitbucket, and Git.
● Modifying the UX and maintaining the web app to capture travel information for international travel assessments for Microsoft employees.
● Leading team workflow modifications to incorporate JIRA/Confluence.
● Migrating databases, ETLs, and SQL Agents/Jobs to new servers and virtual machines.
● Testing, and deploying web app code and databases made by the solutions team.
● Modifying ETLs and databases for improved quality and performance.
● Assisting with creation of conventions and standards, and acting as a guide for them during the code review process.
● Developing and maintaining web apps for clients and internal use.
● Creating blog posts related to technologies used by the solutions team.
o How to Create a 2D Game Map
o Creating an NPC on your 2D Game Map

PowerPivot, Excel, TFS, Microsoft Office, Powershell, Sitecore, SharePoint Online

Jr. Web Developer

Various Things Live - January 2014 to April 2015

Full-stack developer responsible for turning mock-ups into fully developed applications and websites.
Responsibilities
● Creating a procedure which consumes API data and siloes it off into related groups.
● Developed and maintained web applications, microsites, and related databases.
● Created an AngularJS application for scheduling interviews for a career-based service.
Environment: PHP, JavaScript, jQuery, Drupal, WordPress, ModX, AngularJS, HTML, CSS, SCSS, Jade,
Jira/Confluence, Git, SourceTree, Bitbucket, MySQL, Navicat, PHPStorm

Web Developer

RevoTech - March 2013 to January 2014

Web Developer responsible for designing mock ups, maintaining client relationships, and developing
web applications based on approved mock-ups.
Responsibilities
● Created many websites incorporating social media features and custom user experiences in the interface.
● Consulted with clients on what content to include and best practices in their websites and blog posts for SEO performance.
Environment: PHP, JavaScript, jQuery, WordPress, HTML, CSS, Adobe Suite, MySQL, PHPStorm

IS Support Intern

US Signal, Inc - September 2012 to March 2013

First tier support responsible for managing support tickets, web development, and database administration.

Responsibilities

● Maintained reports on dark fiber, billing, and P&L.

● Set up laptops and mobile phones for new employees. Returned and restored them when employees left the company.

● Debugged and fixed internal hardware and our internal billing and sales software. Escalated when appropriate.

● Managed the ticket system, daily burn-down chart, and scrum board for our stand ups.

Environment: PHP, Python, JavaScript, jQuery, Zend Framework, HTML, CSS, Git, PostgreSQL, Excel, PHPStorm, Eclipse, LAMP, Microsoft Office
